# MagicSolv International

The right team to outsource with

• Internet Marketing • Website Development • e-Commerce Solutions • Virtual Assistance

We always work with quality article directories, with 3+ PR and a Alexa Ranking of 2,00,000 or below. We are familiar with technical aspect of the job, where as some websites don't allow the HTML Tags.

We are regular with similar projects, working with some good # of authors. We already have very good list of directories, with good page rank, and good Alexa rating. Here is the sample file, how we compile the article directory list in EXCEL FORMAT...

S.N.	Website	Page Rank	Alexa Raking	User Name	Password	Account Status
1	<a href="http://www.goarticles.com">www.goarticles.com</a>	6	22,782	magic_usr1	*****	Active

We are well aware with the technical aspect of the job. Like

- Not every website allows you to put the HTML conversion of your articles.
- [www.ezinearticles.com](http://www.ezinearticles.com), only allows you to post 10 articles, then they review the things and reserve the right to allow the author to post further. HTML TAGS are allowed. Website links are also allowed.
- [www.isnare.com](http://www.isnare.com), only allows you to post 4 articles/day not more than that. HTML TAGS are allowed. Website links are also allowed but only in resource box.
- [www.goarticles.com](http://www.goarticles.com) is fine and you can post as many articles/day. HTML TAGS are allowed. Website links are also allowed.
